

**City of Warroad Off-Peak Agreement**

FORM #3

I, the undersigned, do hereby agree to the installation of off-peak control in my home.

I understand the periods of off-peak control are determined by Minnkota Power Cooperative in conjunction with the total Minnkota system load during the control months, and that I am solely responsible for ensuring adequate back-up heating in my home.

I further understand that my back-up heat system should be adequate to heat my home for 72 consecutive hours and up to 500 hours per year. Both these times may increase at the discretion of the City's supplier, Minnkota Power Cooperative.

City will routinely inspect ripple receivers, and if a problem is found in the off-peak service equipment, City Utility Crew will make the repairs.

The City of Warroad Utilities has the right to inspect this installation periodically, and if any tampering of the control device or addition of unauthorized equipment is found, a penalty as set by the City will apply to my off-peak account (Utility Policy sect. 114).
